Process & Decision Documentation

Project/Assignment Decisions

For this side quest, I edited the fifth example with new sprites. I wanted to switch out the sprites with something else, but I could not find suitable free sprites online that had the same animations as the fox (most sprites were missing a few actions). I therefore drew the new sprites by myself, with the exception of one background sprite that is just a picture of University of Waterloo used on the official site.

GenAI Documentation

No genAI was used in my addition to the original example code.

Summary of Process

All the new sprites were animated on Clip Studio Paint, and then transformed into sprite sheets through Ezgif.
